738 The University of Texas at Dallas

The Legislative Appropriations Request for FY2024 and FY2025 outlines the funding needed for The University of Texas at Dallas to continue to progress as a nationally competitive, top ranking research university. UT Dallas has experienced remarkable growth and success over the past two decades. Just over 50 years old, UT Dallas is a young university with highly qualified students, a research-intensive faculty, an institutional focus on innovative education in technology, engineering, science and business, and a campus location in the midst of the booming Dallas-Fort Worth Metroplex with strong demand for top talent. UT Dallas, a Carnegie R1 institution, is ranked #64 among public universities in the country according to US News and World Report. The vision of UT Dallas is to become one of the nation's best public research universities and one of the great universities of the world. Created by the founders of Texas Instruments to be the "MIT of the Southwest," the University has stayed true to this vision throughout its first 50 years.

The University of Texas at Dallas has a story to tell. It's a story still being written, sparked by the vision of the institution's founders, and continuing half a century later. UT Dallas has capitalized on its origins and location, transforming into a large, selective public university. The future requires that UT Dallas continue to strive for excellence in all academic areas with a commitment to its guiding principles.

UT Dallas operates under a strategic plan that is grounded in ten complementary themes and encapsulates the collective vision of our community for the future of UT Dallas. The ten themes represent the University's broad goals with each containing multiple strategies to achieve success. They are:

1. Attract Talent
2. Enrich the Student Experience
3. Engage Globally
4. Enrich the Arts
5. Advance Research
6. Become an Economic Engine for the Region
7. Develop Financial and Administrative Systems that Sustain Excellence
8. Create a Culture of Philanthropy
9. Ensure a Sustainable, Rewarding Campus Environment
10. Foster Diversity, Equity, and Inclusion

With support from the Texas Legislature, sound stewardship of university resources, and an ongoing effort to build private support, UT Dallas will continue the rapid ascent that has been its hallmark.

88th Texas Legislature – Key Funding Priorities

State funding makes up approximately 17% of the UT Dallas budget. As a rapidly growing institution educating students in the most expensive areas of study – namely science, technology, engineering, and business – UT Dallas depends heavily on steady state funding to provide qualified graduates and groundbreaking research.

The University's funding priorities for the upcoming Session include:

- Increased funding for instruction through the legislative formulas;
- Funding for key research programs such as the National Research University Fund, the Texas Research Incentive Program, and the Core Research Support Fund;
- Funding for new exceptional item requests including the North Texas Semiconductor Workforce and Development Hub and the Center for Pain Therapeutic Discovery; and

- Capital Construction Assistance Project revenue bond funding for a critically needed new Multidisciplinary Science and Technology Building .

Students

In fall 2021, UT Dallas had an enrollment of 29,696. The University has recovered from its fall 2020 enrollment decline due to COVID and is on track to see record enrollment increases for fall 2022. The University's current estimate is that fall 2022 total enrollment will be around 30,500. The University has a high-quality undergraduate student body with average SAT and ACT scores for incoming freshmen among the highest at public universities in Texas. Traditionally, UT Dallas has ranked first or second in Texas and in the top-five among all public universities in the U.S. in the number of National Merit Scholars enrolled as freshmen. The University's fall 2021 student body was 44% female, 32% Asian-American, 26% Anglo, 14% Hispanic, 17% International, 5% African-American, 3% Two or More Races, and 3% Unknown/Other.

UT Dallas started as a graduate institute and in 1975 began admitting transfer students, primarily from community colleges in the region. UT Dallas has always valued transfer students and works closely with area community colleges to make the transfer process as seamless as possible. The University typically enrolls 1,500-2,000 new transfer students each year.

UT Dallas offers a comprehensive public research university curriculum with recognized strengths in management, science, and engineering. More than 80% of all degrees awarded by the institution are in science, technology, engineering, and mathematics (STEM) and business fields, a greater proportion than at any other public university in Texas. This concentration has been the hallmark of UT Dallas since its beginnings as a graduate research center focused on science and technology. The University's strong emphasis on science, engineering, and business is a distinct advantage as UT Dallas builds national competitiveness in research and addresses the need for a highly educated workforce in the Dallas-Fort Worth region.

Not only are UT Dallas students motivated academically, but they are also focused on making a difference in the community during their time at the University. During the 2021-2022 academic year, over 500 different student organizations provided opportunities for students to engage in the University and surrounding community .

Over 130,000 students have graduated from UT Dallas since its founding with approximately two-thirds of those graduates living in the North Texas region. Twenty-one percent of UT Dallas baccalaureate graduates are first-generation college graduates. Additionally, roughly 42% of the University's undergraduates who earn bachelor's degrees are considered economically disadvantaged.

Student Success

During the 2021-2022 academic year, UT Dallas awarded 4,883 bachelor's degrees, 2,333 master's degrees, and 262 doctoral degrees. The University has steadily improved its graduation rates and currently 58% of undergraduate students complete their degree within four years. Although UT Dallas' 4-year graduation rate is among the leading institutions in the state, the University is continually working to improve student success and graduation rates.

UT Dallas graduates are prepared to join the workforce. The University ensures this by continually adjusting its programs and curricula to meet the needs of employers. As an example, the Naveen Jindal School of Management at UT Dallas operates industry advisory boards in information systems, supply chain management, marketing, and health care leadership and management with leaders from industry that meet quarterly to provide insight and guidance, and help the University modify its curriculum in a just-in-time fashion.

The University's career center focuses on successfully moving students into the workforce. During the 2021-2022 academic year, over 480 companies and 3,900 students

Administrator's Statement

10/5/2022 2:10:38PM

88th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

738 The University of Texas at Dallas

engaged with each other around job and internship opportunities through career fairs, while over 4,000 employers posted 18,000+ job opportunities to which UT Dallas students could apply. Additionally, over 2,900 undergraduate and graduate students participated in experiential learning opportunities including internships and externships. As a precursor to full-time employment, the career center also facilitated the employment of over 2,300 student employees in hourly campus positions, including those in federal work study jobs, which provide students with over \$4 million in earnings each year.

Accomplished Faculty

UT Dallas offers 147 academic programs across eight schools. Virtually all (99.6%) of the University's 569 tenured and tenure-track faculty hold terminal degrees in their fields. The faculty include members of the National Academies of Science and Engineering, Guggenheim and Fulbright Fellows, and recipients of such distinguished recognitions as the Victoria Medal of the Royal Geographical Society and the Virgil Kaufman Gold Medal from the Society of Exploration Geophysicists.

UT Dallas must continue to recruit top talent in key scholarly fields. Salaries at UT Dallas are competitive within the state, but as UT Dallas receives enhanced national recognition, the University is becoming increasingly vulnerable to other institutions recruiting its best faculty members.

Growing Research

Between FY2017 and FY2021, the research enterprise at UT Dallas experienced impressive growth. Federal research expenditures grew 61% from \$36 million to \$58 million per year, and total research expenditures for this period grew from \$113 million to \$122 million per year. The early estimate is that FY2022 federal research expenditures will increase by another \$2 million to a total of \$60 million, a 66% increase over the FY2017 figure. Future research expenditures should continue this steady, organic growth in line with the University's strategic plan.

Focused Private Fundraising

UT Dallas understands the importance of private fundraising as one element of a nationally competitive institution. In 2021, the University launched New Dimensions: The Campaign for UT Dallas, a \$750 million comprehensive campaign focused on attracting the best and brightest students, enhancing lives through transformative research, and transforming the arts on campus. The campaign will build upon a half-century of momentum to extend the University's impact across the city of Dallas, the state of Texas and beyond.

To date, the University has raised more than \$300 million toward that goal, including \$73.9 million to support the Edith and Peter O'Donnell Jr. Athenaeum at UT Dallas, a new cultural district located on approximately 12 acres at the southeastern edge of the campus.

Additionally, the University's endowment continues to grow. As of May 2022, it is valued at \$734 million, an increase of \$139 million over the past two years.

Spotlight on Tuition and Student Debt

UT Dallas is focused on controlling costs for students and families. In fall 2021, 13,469 or 46% of UT Dallas students, who were enrolled in the University's first-in-the-state guaranteed tuition plan, paid no increase in tuition. The guaranteed tuition rate plan fixes tuition and required fees for four years and is designed to help students plan for the cost of a college education by knowing exactly what tuition and fees will be for four years of education. In addition, the University has aggressive need-based and merit-based scholarship programs in place to ensure limited financial resources do not present barriers to access a UT Dallas education. In Academic Year 2022, UT Dallas awarded \$80 million in grant aid of which \$33.6 million (42%) was institutionally funded. During this same year, UT Dallas awarded its students \$116 million in scholarships of which \$94.4 million (81%) was institutionally funded.

738 The University of Texas at Dallas

U.S. News and World Report ranked UT Dallas among national universities whose students graduated with the least student debt after graduation. Kiplinger consistently ranks UT Dallas as a Best Value University. Because of the University's aggressive financial aid packages, two-thirds of students graduate with no debt at all. Of the approximately one-third of students who do graduate with debt, the average debt at graduation is under \$24,000.

Importance to the Region

UT Dallas provides education and research vital to the success of the businesses that are crucial to the future of the Dallas-Fort Worth, Texas, and U.S. economies. Business growth in the region is demanding more educated and technically competent workers. To support continued economic growth, industry is looking to UT Dallas to provide educational opportunities to undergraduates and graduates in business, science, advanced technology, computer science, and engineering.

UT Dallas straddles the boundaries of Dallas and Collin counties and the cities of Richardson, Dallas, and Plano. The active participation of executive leaders on the UT Dallas executive board and advisory councils ensures good relationships with regional businesses. The University provides highly educated graduates at all levels and research partnerships to further the development of the regional economy.

88th Texas Legislature – Key Funding Priorities

State funding makes up approximately 17% of the UT Dallas budget. As a rapidly growing institution educating in students in the most expensive areas of study – namely science, technology, engineering and business – UT Dallas depends heavily on steady state funding to provide qualified graduates and groundbreaking research.

The University's funding priorities for the upcoming Session include:

- Increased funding for instruction through the legislative formulas;
- Funding for key research programs such as the National Research University Fund, the Texas Research Incentive Program, and the Core Research Support Fund;
- Funding for new exceptional item requests including the North Texas Semiconductor Workforce and Development Hub and the Center for Pain Therapeutic Discovery; and
- Capital Construction Assistance Project revenue bond funding for a critically needed new Multidisciplinary Science and Technology Building.

Formula Funding

As a result of the 87th Legislature, general revenue appropriations to UT Dallas grew by \$30.7 million over the previous biennium, ensuring stability for core operations and research support at such a rapidly growing institution. Maintaining the formula funding gains made during the 87th Legislature is the top priority for UT Dallas as these funds provide the financial foundation for the University to succeed in its academic mission.

Key Research Funds

Over the past decade, the Legislature has made important investments aimed at developing more national research universities in Texas. Funds that have had tremendous impact include the National Research University Fund, the Texas Research Incentive Program, and the Core Research Support Fund. These funds have advanced the education, research, and reputations of the state's eight emerging research universities and should be maintained and enhanced.

The National Research University Fund (NRUF) has been a welcome funding source for UT Dallas since the University became eligible in FY2018. Funds have been used to recruit nationally renowned faculty members and top PhD candidates, launch key university research centers, and support cross-cutting interdisciplinary research projects. However, NRUF funding to UT Dallas has steadily decreased from \$7.6 million in FY2018 to now \$5.7 million in FY2022. As additional institutions become eligible for NRUF, this steady funding for each institution will continue to decrease. Providing increased funding to the NRUF corpus would be a worthy investment for

738 The University of Texas at Dallas

the state.

The Texas Research Incentive Program (TRIP) provides emerging research universities with state dollars to match private investments in research and has enabled Texas' eight emerging research institutions to display their strengths and advance toward becoming national research universities. The TRIP program represents the type of partnered investment that allows the state to maximize the impact of its limited funds and reward successful performance at institutions.

UT Dallas has been significantly impacted over the past six years as appropriations to TRIP have been reduced. The backlog of state matching funding earned by the emerging research universities but not yet appropriated currently stands at \$307 million. The last private donation matched by state funding was received by UT Dallas on September 1, 2016. No eligible gifts received by the eight emerging research institutions since that date have been matched by state funding. UT Dallas' portion of earned state matching funds in the TRIP backlog is \$60 million. UT Dallas requests that the Texas Legislature fund the full \$307 million TRIP backlog during the upcoming Session.

Exceptional Item Requests

For the 88th Texas Legislature, UT Dallas has proposed approximately \$50 million in exceptional items requests that will propel the University toward being the next premier global institution that Texas needs. By almost any measure, UT Dallas ranks third among public universities in Texas. Discussions are underway to create more flagship universities in Texas, and UT Dallas has the quality, focus and level of excellence required to fulfill this role for Texas.

UT Dallas has identified key areas of concern for Texas and matched those with core strengths and competencies at the University. State investments in UT Dallas would provide great benefits to Texas in areas such as 1) semiconductor workforce and research development, 2) creation of non-opioid pain therapies, 3) recruitment of more underrepresented minorities into STEM-focused education, and 4) enhancing student training and education in the arts.

The University requests a \$40 million exceptional item to develop the North Texas Semiconductor Research and Development Hub, which will address the severe labor shortage in the semiconductor industry, foster innovative start-up companies, and enhance key research in this area. North Texas is home to a significant industry presence for semiconductor-related technologies. However, this region lacks key training facilities and secure laboratories for entrepreneurs and researchers to innovate. UT Dallas will work with key businesses and community colleges in the region to significantly impact the needs in the semiconductor industry, which will have long term benefit for Texas.

The University requests a \$10 million exceptional item to create the Center for Pain Therapeutic Discovery, which will create the non-opioid treatments needed to defeat the suffering created by the chronic pain and opioid epidemics. Arthritis pain, lower back pain, headache disorders and opioid use disorder are leading causes of disability in Texas. All of these pain-related disorders are poorly managed by existing therapeutics, leading to significant healthcare burdens and lost productivity costs. The Center will develop new pain therapeutics by leveraging the high impact science at UT Dallas to turn its basic discoveries into tomorrow's pain medicines. The Center will transform North Texas into an international hub for non-opioid analgesic development --- attracting scientists and investment from around the world to overcome the opioid epidemic.

The University requests a \$2 million exceptional item as additional state funding for the existing Academic Bridge Program at UT Dallas. This highly successful program, which recruits to UT Dallas first generation and underrepresented minority students from urban school districts, currently receives \$1,326,830/biennium in nonformula support. The Program has recorded extraordinary achievements in "bridging" promising students as they make the transition from inadequate K-12 educational preparations to successful study of rigorous college curricula. Ninety percent (90%) of freshmen return as sophomores, and the 6-year graduation rate is 61%.

Administrator's Statement

10/5/2022 2:10:38PM

88th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

738 The University of Texas at Dallas

The University requests a \$2 million exceptional item for the Crow Museum of Asian Art, which became part of UT Dallas in 2019. This funding will train UT Dallas students in art conservation, art collection, and art historical and artifact research to help foster an appreciation for this field and develop docents for the Crow Museum. These docents will also be valuable when the University opens in 2024 the new Edith and Peter O'Donnell Jr. Athenaeum, which will house not only a second Crow Museum but also serve as the initial building of a new arts district at UT Dallas.

Infrastructure Needs

As stated above, UT Dallas has experienced a unique and rapid growth trajectory. While the University does not plan to submit Capital Construction Assistance Program revenue bond funding requests to support campus infrastructure, UT Dallas indeed has remarkable infrastructure challenges. In fact, the Texas Higher Education Coordinating Board (THECB) indicates that UT Dallas has a space deficiency of 1,307,624 square feet, which places UT Dallas among the top 10 public universities in Texas in terms of total space deficit. Additionally, THECB's most recent space usage efficiency score for UT Dallas is 200 out of a maximum score of 200, placing UT Dallas as one of only two public academic universities in Texas to receive this maximum score.

The most important building to support the University's trajectory is a Multidisciplinary Science and Technology Building (MSTB) at a cost of \$198 million. The proposed 220,000 square foot project would build on the success of the Bioengineering and Sciences Building (BSB), which is currently filled. The BSB currently houses 44 tenured/tenure-track research active faculty, 28 post-doctoral fellows, 63 research staff, 299 graduate research/teaching assistants, and 339 undergraduate research students. In FY2021, faculty in the BSB generated \$17.6M in federal research expenditures. MSTB would effectively double the activity, investment and return in UT Dallas' most successful research endeavor and add much needed lecture and instructional laboratory space.

Organizational Chart

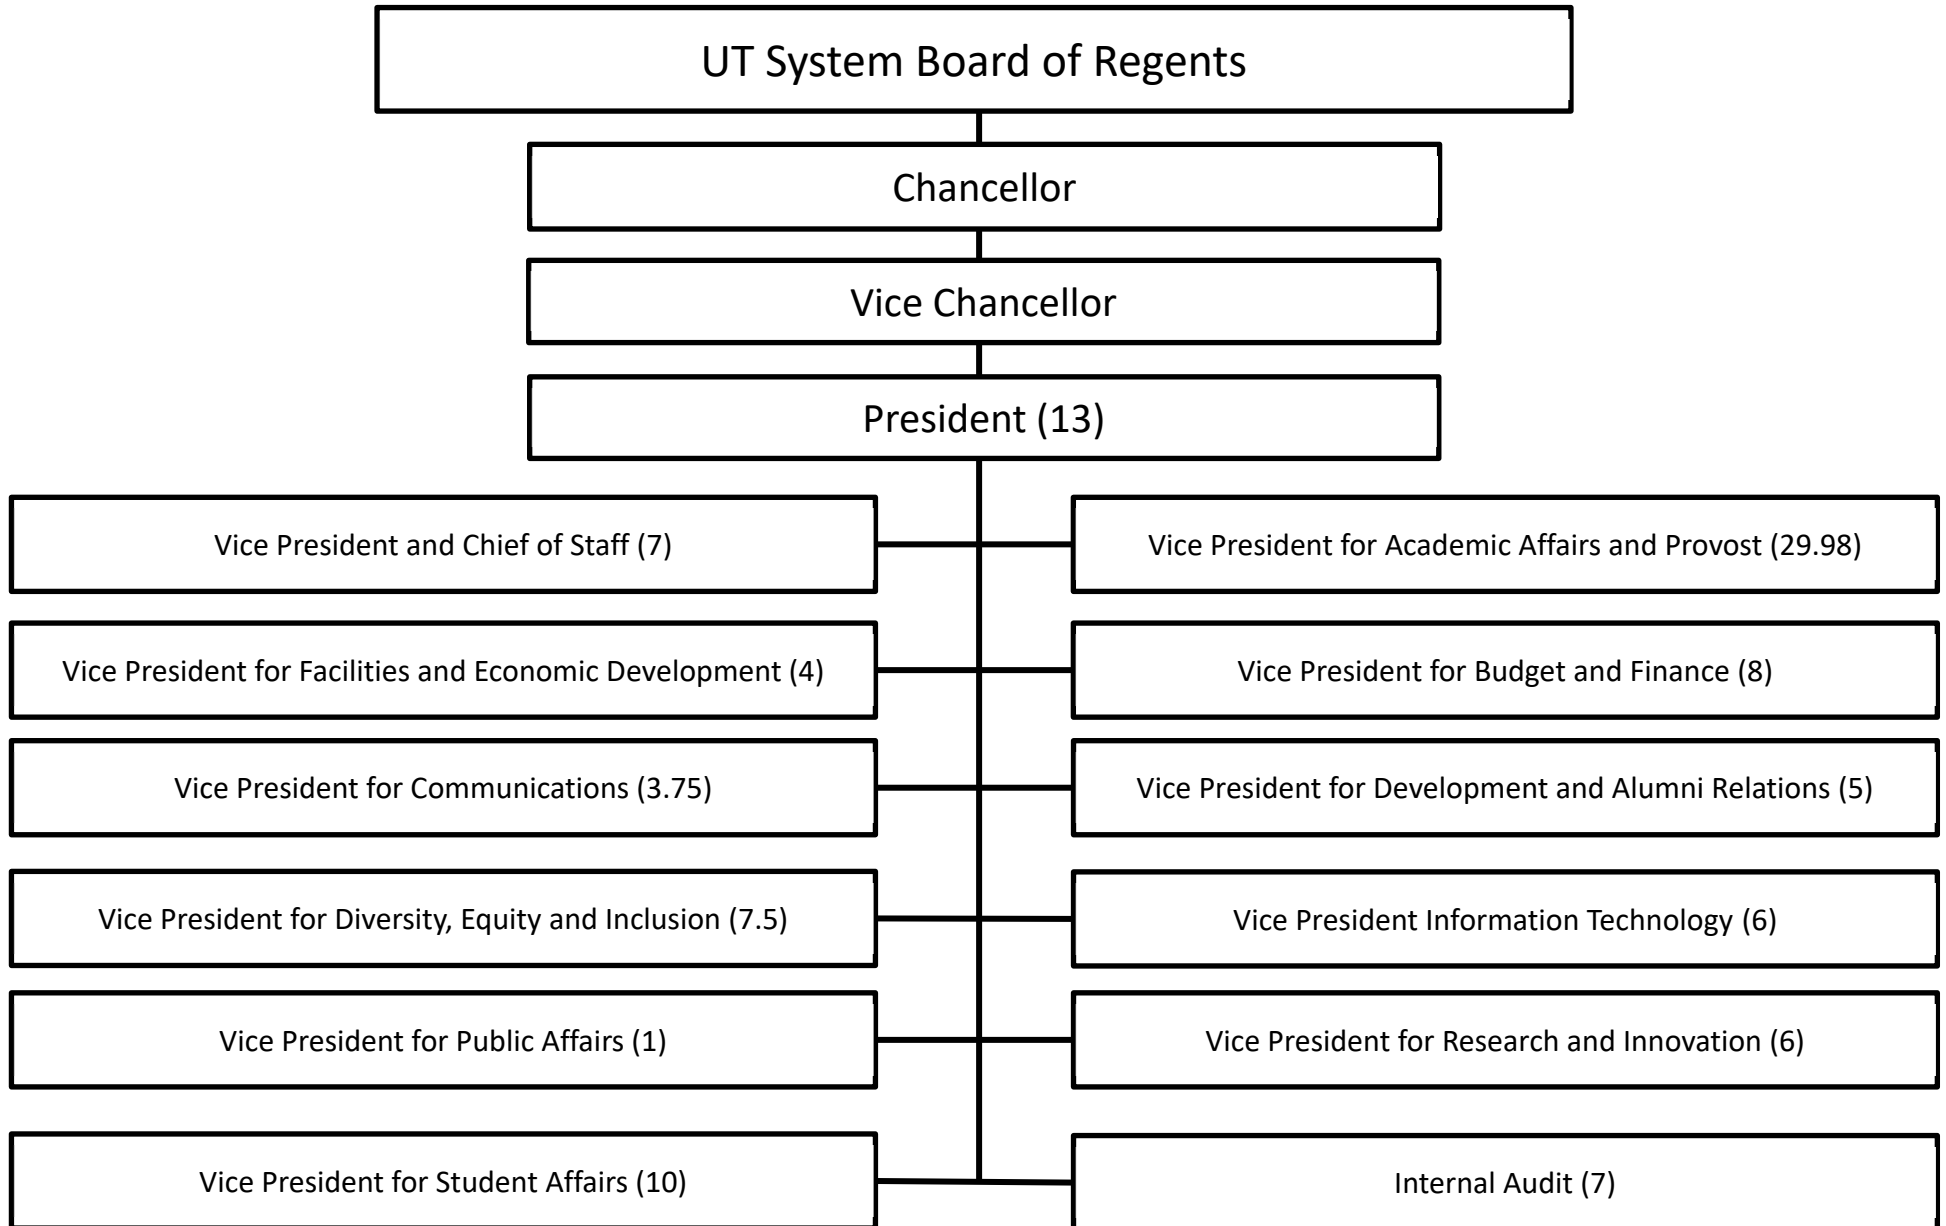

The UT System Board of Regents is reflected on the accompanying Organizational Chart.

Criminal Background Checks

Criminal background checks at The University of Texas at Dallas are authorized by Texas Education Code § 51.215 Access to Police Records of Employment Applicants, Texas Government Code § 411.094 Access to Criminal History Record Information: Institution of Higher Education, and Texas Government Code § 411.135 Access to Certain Information by Public. Effective September 1, 2010, the following is the criminal background check policy of The University of Texas at Dallas:

- A. To obtain criminal history record information on all newly hired faculty and staff members.
- B. To obtain criminal history record information on applicants (whether new or continuing employees) who are under final consideration, following normal screening and selection processes, for a position that is designated as a security sensitive position.
- D. To obtain criminal conviction record information on a current employee who is under consideration for a transfer, promotion, or reclassification from a non-security sensitive position to a position designated as a security sensitive position.
- F. To obtain criminal conviction record information on a current employee who is under consideration for a transfer, promotion, or reclassification from one security sensitive position to another security sensitive position and on whom the institution did not previously obtain either criminal history record information or criminal conviction record information.
- I. To obtain criminal conviction information on current employees, students, and volunteers whose assignments involve contact with minors on a regular basis outside the scope of faculty/student instruction.
- J. To use such criminal history record or criminal conviction information for the purpose of evaluating applicants for employment in security sensitive positions.
- L. To regard such criminal history or criminal conviction information as confidential as required by law.

The University of Texas at Dallas

UT Dallas – Descriptions of Functional Units

President - The President is the chief executive officer of the university and exercises broad delegated authority for campus administration.

Chief of Staff - The Office of the Chief of Staff serves as deputy to the president and as a liaison with campus leadership. This office responsibilities include developing policy recommendations, assisting in outreach to the University's community partners and supporters, and providing oversight of several university-wide administrative functions, including: human resources; legal affairs; environmental health and safety; information security; internal audit; institutional compliance, equity, and Title IX initiatives; and the UT Dallas police

Provost - The Provost is responsible for the formulation and implementation of educational policy. The provost oversees faculty hiring, evaluation, and advancement; budget priorities and budget allocations for the schools; and academic facilities. The provost serves as the University's primary contact with the UT System Office of Academic Affairs.

Facilities and Economic Development - The Office of the Vice President for Facilities and Economic Development oversees facilities, buildings, parking, transportation, and real estate management.

Budget and Finance – The Office of Budget and Finance is responsible for all financial functions, including budget, finance, payroll, procurement and expense reimbursement.

Communications - The Office of Communications provides strategic leadership to shape the character, direction and principles of institutional communications at UT Dallas and organizes resources in the areas of communication and marketing, brand identity and positioning, internal and external communications, message content, media visibility/media relations and crisis communication.

Development and Alumni Relations - The Office of Development supports the university's fundraising efforts, working closely with the university's deans and program directors.

Diversity, Equity and Inclusion - The Office of Diversity, Equity and Inclusion promotes the fulfillment of the UT Dallas commitment to embrace, enhance and celebrate diversity at all levels of the University through the efforts of faculty, staff, student and executive leadership. UT Dallas aspires to be a leader in leveraging diversity to reach the highest levels of excellence.

UT Dallas – Descriptions of Functional Units, continued

Information Technology – The Office of Information Technology is committed to providing innovative, secure information technologies that support students, faculty and staff and help achieve the University’s goals and initiatives. In addition to delivering services marked by excellence, value and reliability, the office serves as a resource for the latest advances in higher education technology.

Public Affairs - The Office of Public Affairs is responsible for the coordination and oversight of the University’s government and community relations, with an emphasis on state legislative affairs.

Research - The Office of the Vice President for Research and Innovation enhances UT Dallas’ research profile by anticipating new technology, potential collaboration partners and research opportunities for the University.

Student Affairs – The Office of the Vice President for Student Affairs supports the University’s commitment to produce engaged graduates prepared for life, work and leadership through co-curricular and extracurricular programs, services and support related to all aspects of campus life.

Internal Audit - The Office of Internal Audit enhances and protects organizational value by providing risk- based and objected assurance, advice, and insight to UT Dallas and UT System executive management relating to the achievement of the University’s strategic and operational objectives.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, research enhancement, student services and institutional support. The funds are distributed on a weighted semester credit hour basis. The rate per weighted semester credit hour is established by the Legislature each biennium.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

(1) - Formula funded strategies are not requested in 2024-25 because amounts are not determined by institutions.

------	-------------	----------	----------	----------	---------	---------

This strategy provides the funding for salaries, wages, supplies and materials for the Callier Center for Communication Disorders. Clinical fees, tuition for preschool students, and contracts help support these programs at the center. Gift funding is used to assist patients in need of financial assistance. Endowment funding supports the development and research activities of the center and not the day to day operational activities.

Output Measures:

Number of children enrolled in the Callier Preschool Deaf Education Program – FY21 = 40, FY22 = 40, FY23 = 40, FY24 = 40, and FY25 = 40.

Number of children enrolled in the Preschool Daycare – FY21 = 185, FY22 = 189, FY23 = 208, FY24 = 216, and FY25 = 216.

Number of graduate students in the UT Dallas Practicum – FY21 = 238, FY22 = 236, FY23 = 236, FY24 = 236, and FY25 = 236.

Efficiency Measures:

Cost of providing clinical and educational services as a function of the number of daily visits – FY21 = 274.00, FY22 = 265.00, FY23 = 265.00, FY24 = 265.00, and FY25 = 265.00.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

External: Callier has been recognized as an excellent source to help Texans with communication disorders. The Callier Center is a nationally recognized institution.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Infrastructure Support formula distributes funding associated with plant-related formulas and utilities. This formula is driven by the predicted square feet for universities' educational and general activities produced by the Coordinating Board Space Projection Model. The portion of the formula related to utilities is adjusted to reflect differences in unit costs for purchased utilities, including electricity, natural gas, water and wastewater, and thermal energy.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

(1) - Formula funded strategies are not requested in 2024-25 because amounts are not determined by institutions.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The mission of the UT Dallas NanoTech Institute is to conduct research and develop innovations in nanotechnology, an area that enables the fabrication of materials and devices having entirely new physical or chemical properties as a result of engineering structures smaller than the wavelength of light. Nanoscience is revolutionizing such disparate fields as electronics, medicine, communications, energy, and manufacturing. The Institute’s industrial affiliates program enables participating companies to gain early access to breakthroughs and helps the Institute focus research so that it addresses the most important needs of industry.

The Institute founded and sponsors the George A. Jeffrey NanoExplorers Program, which promotes nanotechnology-based education for high school students entering the 10th-12th grades. This program inspires high school students to become productive scientists and engineers by enabling them to do original research work, which can result in their co-authorship of publications and patents. Many UT Dallas undergraduates receive their initial training on how to do original research in the NanoTech Institute, with research costs paid for by the Institute.

The Institute also sponsors the NanoInventors program, which enables retirees and individuals in job transitions to conduct their own research.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The UT Dallas Academic Bridge Program recruits students from urban school districts that do not send large proportions of their graduating seniors to selective universities. Typically, these students are members of the first generation in their families to attempt higher education who have the potential to succeed in a rigorous college environment if provided effective support. Many are from minority groups that are underrepresented in college. The Program has a decade-long record proving that it has the solution to this challenge. It commences with an intensive “speed-up” program offered on campus during the summer before the fall of the freshman year that features intensive study of math, science, writing, and time-management skills. This is followed with continued support by organized group study and peer tutorial sessions during the first two years of college.

------	-------------	----------	----------	----------	---------	---------

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Middle School Brain Years initiative developed by the UT Dallas Center for BrainHealth advances the reasoning, problem solving, and innovation skills of young adolescents. During the middle school years (early adolescence), the brain undergoes an epoch in development that prepares the neural connections to develop higher-order executive function skills, such as analysis, problem solving, and innovation. This successful program has helped raise STAAR scores by 25% or more and improve academic performance in thousands of Texas students. Investing in student learning during the middle school years allows students to attain career, military, and college readiness, positively impacting the Texas economic forecast for years to come.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Core Research Support Fund is established to provide funding to promote increased research capacity at those institutions designated as an emerging research university under the Higher Education Coordinating Board's (THECB) accountability system.

Funding is to be expended for the support and maintenance of educational and general activities, including research and student services that promote increased research capacity.

A legislatively determined amount of funding is appropriated to eligible institutions as follows: (1) 50 percent based on the average amount of restricted research funds expended by each institution per year for the three preceding state fiscal years as reported to THECB; and (2) 50 percent based on the average amount of total research funds expended by each institution per year for the three preceding state fiscal years as reported to THECB.

Funds appropriated to the African American Museum Internship are for the purpose of supporting an internship at the African American Museum in Dallas . Amounts appropriated in this strategy are funds trusteeed to The University of Texas at Dallas, and The University of Texas at Dallas may not transfer the amount appropriated to other purposes. The University of Texas at Dallas may require periodic submission of data and reports as they consider necessary to assess the overall performance of the museum internship program. By September 1 of each year, the museum shall report data to The University of Texas at Dallas as required to assess the overall performance of the internship program. The University of Texas at Dallas is required to report to the Legislative Budget Board and the Governor's Office concerning the effectiveness of the program by October 1, 2022.

FULL-TIME EQUIVALENT POSITIONS (FTE):		7.00	12.00

DESCRIPTION / JUSTIFICATION:

North Texas is home to a significant industry presence for semiconductor-related technologies. However nationwide, the semiconductor industry has a severe labor shortage, particularly among technicians. A key reason for the labor shortage for these high-paying jobs is the absence of training facilities due to the expensive nature of the equipment and lack of programs poised to meet the pipeline needs.

The North Texas Semiconductor Research and Development Hub will address the pressing workforce need in this industry and foster innovative start-up companies in the semiconductor technology area. Working in partnership with community colleges, the Hub will provide hands-on experiences to broaden access to semiconductor industry education and training to ensure Texas continues to have a steady workforce pipeline for area companies. The Hub will also provide shared, yet secure, access to critical equipment for fledgling small businesses to enable entrepreneurs to build prototypes and launch small-scale production. The Hub will serve as an incubator program for semiconductor entrepreneurs, particularly those who are focusing on national security/infrastructure needs, to grow their businesses and produce prototype devices in a completely secure facility. The Hub will also serve as a secure focal point for UT Dallas researchers to engage with the Department of Defense and homeland defense partners to address semiconductor research problems of national security and significance.

FULL-TIME EQUIVALENT POSITIONS (FTE):		7.00	15.00

DESCRIPTION / JUSTIFICATION:

Arthritis pain, lower back pain, headache disorders and opioid use disorder are leading causes of disability in Texas. All of these pain-related disorders are poorly managed by existing therapeutics, leading to significant healthcare burdens and lost productivity costs. The mission of the Center for Pain Therapeutic Discovery is to create the efficacious, non-opioid treatments needed to defeat the suffering created by the chronic pain and opioid epidemics. The Center will develop new pain therapeutics by leveraging the high impact science at UT Dallas on mapping molecular profiles of human pain neurons and circuits. The Center will build the medicinal chemistry and screening infrastructure to turn its basic science discoveries into tomorrow's pain medicines. The Center will also expand its work with the Southwest Transplant Alliance, also located in Dallas, to create a unique human neuroscience discovery platform that will serve as an internationally-recognized example for the future of neuroscience research. With focused translational biomedical activity, North Texas will transform into an international hub for non-opioid analgesic development --- attracting scientists and investment from around the world to overcome the opioid epidemic. By leveraging UT Dallas expertise in molecular mechanisms of pain with therapeutics development capabilities, the Center will be poised to address a societal problem of concern to Texans and to the nation.

DESCRIPTION / JUSTIFICATION:

The University requests a \$2 million exceptional item as additional state funding for the successful Academic Bridge Program at UT Dallas. The Program, which recruits to UT Dallas first generation and underrepresented minority students from urban school districts, currently receives \$1,326,830/biennium in nonformula support. The Program has recorded extraordinary achievements in “bridging” promising students as they make the transition from inadequate K-12 educational preparations to successful study of rigorous college curricula. Ninety percent (90%) of freshmen return as sophomores, and the 6-year graduation rate is 61%.

DESCRIPTION / JUSTIFICATION:

In 2019, the Crow Museum of Asian Art's permanent collection was gifted to the University of Texas at Dallas, ensuring its continued preservation and care and building upon the Crow family's legacy to present the highest-caliber Asian art objects and artists to the broader community. Along with its original flagship location in the downtown Dallas Arts District, the Crow will be an integral part of UTD's Athenaeum, set to open in 2024, which will house a second museum location for the betterment and enrichment of student campus life.

The Crow Museum of Asian Art at UT Dallas requests exceptional item funding for the development and launch of an arts-based University Student Docent Program initiative, based on the Crow Museum's permanent collection. In 2019, the Trammell and Margaret Crow family donated to the University the entire collection of the Trammell and Margaret Crow Museum of Asian Art. The Crow Museum's collection demonstrates the diversity of Asian art, with more than 1,000 works from Cambodia, China (including Tibet), India, Indonesia, Japan, Korea, Myanmar, Nepal, Pakistan, Thailand and Vietnam, spanning from the ancient to the contemporary, as well as a library of more than 12,000 books, catalogs and journals.

This funding will train UT Dallas students in art conservation, art collection, and art historical and artifact research to help foster an appreciation for this field and develop

	Total Expenditures		27.1%		\$24,576,610	\$90,524,521		28.6%		\$23,285,053	\$81,376,834		

B. Assessment of Attainment of HUB Procurement Goals

Attainment:

Overall, the University of Texas at Dallas continued to expand our HUB spend throughout 2020 - 2021. Among agencies spending more than \$5,000,000, UT Dallas ranked 13th in 2020 and 15th in 2021. In particular, our HUB spend increased significantly in Building Construction, and we continue to exceed our goals for commodities purchases. However, spending in Special Trade and Other Services decreased slightly and is currently an area of increased focus on improvement.

Applicability:

All procurement categories are applicable to this agency's operations although Heavy Construction is performed primarily by the UT System's OFPC and reported by them.

Factors Affecting Attainment:

While the University of Texas at Dallas did not meet all statewide HUB goals in 2020 and 2021, the University continues to show improvement in total dollars spent with HUB vendors over these two years. The HUB staff works closely with the Purchasing department as well as key stakeholders across campus, including Facilities Management, to ensure HUB firms are provided every opportunity available and help increase participation in the Professional Services and Other Services categories.

C. Good-Faith Efforts to Increase HUB Participation

Outreach Efforts and Mentor-Protégé Programs:

- 1) HMSD Expo & Spot Bid Fair
- 2) UT Systemwide HUB Construction Opportunities and Good & Services Outreach webinar (2020, 2021)
- 3) Senator Royce West Spot Bid Fair & HUB Expo (2020, 2021)

6.A. Historically Underutilized Business Supporting Schedule
88th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

Date: **10/5/2022**
Time: **2:11:33PM**

Agency Code: **738** Agency: **The University of Texas at Dallas**

- 4) Several Expos (Collin Black Chamber, HUB Expo, Hard Hat Construction Expo, ACB Small Business Expo)
- 5) Sponsor "Meet & Greet" event for Chartwells and food service vendors regarding Catering/Food Delivery Services solicitation

HUB Program Staffing:

Director of Supplier Diversity Programs and HUB Manager - share solicitation notices with chambers/construction trade groups/business advocacy organizations to disseminate with their members and clients; conduct inreach meetings with university departments to promote HUB utilization and identify opportunities; meeting with HUB vendors; host virtual "Doing Business."

Current and Future Good-Faith Efforts:

The University of Texas at Dallas remains committed to maintaining attentiveness in increasing HUB contract awards through close coordination between HUB staff, Purchasing, and key stakeholders across campus. Continuous efforts are being made to improve in all areas where HUBs can be utilized, and more emphasis continues to be placed on campus in reach and vendor outreach initiatives.

Center for Applied Biology

(1) Year Non-Formula Support Item First Funded:	2000
Year Non-Formula Support Item Established:	1998
Original Appropriation:	\$250,000

(2) Mission:

The UT Dallas Center for Applied Biology works to advance human health by making discoveries in basic biological research and by expediting the application of these fundamental discoveries in treatments and therapies. The Center creates important research discoveries, educates highly skilled professionals for positions in biomedical research, and recruits a diverse pool of students into the pursuit of biomedical science and technology education.

(3) (a) Major Accomplishments to Date:

The program focuses on finding diagnoses and cures for major diseases. The special item funding has provided the recurring seed money for the continued expansion of biology research at UT Dallas and has provided the leverage for the University's biology faculty who are currently generating \$4 million per year from external grants and contracts to conduct innovative and leading-edge research in broad areas of biomedical research to address human diseases. The special item funding provided support for faculty researching urinary tract infections and multidrug resistance. The funding also provided the essential overhead costs associated with Cancer Prevention and Research Institute of Texas (CPRIT) grants. The most recent special item funding led to CPRIT awards for research on prostate cancer genomes in collaboration with the UT Southwestern and for research targeting specific pathways to suppress lung tumor metabolism to create new cancer therapies. In addition, as a result of this state funding, faculty obtained critical long-term research support from NIH and private donations for their work on bacterial pathogenesis and multidrug resistance.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The next two years will be marked by recruitment and research support for exceptional biology faculty members to expand their impact on our understanding and treatment of human diseases. The University will utilize the funds to build upon our current strengths in microbial pathogenesis as well as cancer biology and genomics to make significant impact on treatment of multi-drug resistant infections and inflammation-driven prostate cancers, as well as utilizing new found cancer genomic information to make better diagnoses to guide personalize cancer treatment in clinics.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

None.

(5) Formula Funding:

This special item funding supports start-up costs for new faculty and programs, and hence does not generate formula funding.

(6) Category:

Research Support

738 The University of Texas at Dallas

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

External grant funds, as noted above.

(9) Impact of Not Funding:

Increases in biology discoveries research funding will decrease due to reduced investment.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

It is anticipated that there will be a decade long need to continually expand the research staff in biology and hence a corresponding need for this special item support.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

Benchmarks for this program are simple, clear, and objective - namely generation of external funding, publications in prestigious journals, patents, and spin-off private companies.

(13) Performance Reviews:

Performance reviews are regularly carried out by monitoring the benchmarks noted above. Financial performance is reviewed by requiring that the program be awarded at least three new external grants annually.

738 The University of Texas at Dallas

Center for Pain Therapeutic Discovery

(1) Year Non-Formula Support Item First Funded:	2024
Year Non-Formula Support Item Established:	2024
Original Appropriation:	\$0

(2) Mission:

Arthritis pain, lower back pain, headache disorders and opioid use disorder are leading causes of disability in Texas. All of these pain-related disorders are poorly managed by existing therapeutics, leading to significant healthcare burdens and lost productivity costs. The mission of the Center for Pain Therapeutic Discovery is to create the efficacious, non-opioid treatments needed to defeat the suffering created by the chronic pain and opioid epidemics. The Center will develop new pain therapeutics by leveraging the high impact science at UT Dallas on mapping molecular profiles of human pain neurons and circuits. The Center will build the medicinal chemistry and screening infrastructure to turn its basic science discoveries into tomorrow's pain medicines. The Center will also expand its work with the Southwest Transplant Alliance, also located in Dallas, to create a unique human neuroscience discovery platform that will serve as an internationally-recognized example for the future of neuroscience research. With focused translational biomedical activity, North Texas will transform into an international hub for non-opioid analgesic development --- attracting scientists and investment from around the world to overcome the opioid epidemic. By leveraging UT Dallas expertise in molecular mechanisms of pain with therapeutics development capabilities, the Center will be poised to address a societal problem of concern to Texans and to the nation.

(3) (a) Major Accomplishments to Date:

The Texas Pain Research Consortium, started at UT Dallas, is one of the largest networks of pain researchers in the nation. Since 2014, UT Dallas has recruited international leaders in pain research. This group of investigators, which spans 4 departments across 3 schools, publishes more than 30 scientific papers per year in leading journals like Cell, Nature Neuroscience, and Science Translational Medicine. A key aspect of pain research at UT Dallas is the entrepreneurial nature of its investigators. Five companies have spun out of UT Dallas neuroscience labs, and several of these have been led by UT Dallas PhD students and have employed UT Dallas graduates. CerSci Therapeutics, the first of these spinouts, was acquired by Acadia Pharma in 2020, and the non-opioid pain therapeutic developed by CerSci is now in multiple phase II clinical trials. 4E Therapeutics, another spinout now based in Austin, acquired a 7.5M NIH HEAL grant and is now approximately 12 months away from starting phase I clinical trials. These successes point to the unique nature of pain research at UT Dallas. University investigators are leading scientists who make important discoveries and are driven to turn those discoveries into treatments that Texans with pain desperately need.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Leveraging the scientific foundation in basic research, the Center for Pain Therapeutic Discovery will recruit new staff in medicinal chemistry, bioengineering and neuroscience to build the drug development platforms needed to tackle the opioid epidemic. A core for translational pain research will be established that will turn the Center's ongoing collaboration with the Southwest Transplant Alliance into the most technologically advanced target identification engine using human neurons recovered from organ donors. Functional assays developed at this core will enable target identification directly in human pain sensing neurons completely independent of animal models. Therapeutic development scientists will work directly with pain scientists to advance these new pain targets, develop screening platforms, and discover new drugs. Commercialization experts will move these therapeutics toward the clinic. The activity catalyzed by the formation of the Center for Pain Therapeutic Discovery will transform North Texas into a world-leader in creating tomorrow's non-opioid pain medicines. It will also be an economic engine --- attracting new biotech investment and creating jobs at UT Dallas and in the private sector that will expand around UT Dallas.

738 The University of Texas at Dallas

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

While there has been no prior funding source, UT Dallas has earned significant federal support from the NIH that demonstrates expertise in fundamental research capacity in this area.

(5) Formula Funding:

None.

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

None.

(9) Impact of Not Funding:

The central goal of this Center addresses a major societal issue facing Texas and the nation. Approximately 3 million Texas adults suffer from chronic pain with lost productivity estimated at \$18 billion. In 2019, there were nearly 3,200 opioid-related overdoses in Texas. Four of the nation's top 24 cities for opioid misuse are in Texas. Non-opioid pain therapeutics are urgently needed for Texas and the nation. The impact of not funding this exceptional item is that this significant problem remains unaddressed and an accompanying opportunity loss relative to the potential economic impact that can be realized with pain therapeutic innovations reaching the marketplace.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuation:

The typical drug discovery to clinical deployment cycle is approximately 15 years, however, with this Exceptional item support, the Center aims to cut the time nearly in half. Therefore, exceptional item funding is requested for four biennia with expiration at the end of FY2031. During that eight-year time frame, the Center for Pain Therapeutic Discovery will use the leveraged state funding to develop a sustaining, externally funded model to ensure continued success and progress.

(11) Non-Formula Support Associated with Time Frame:

Exceptional item funding is requested for four biennia with expiration at the end of FY2031. During that eight-year time frame, the Center for Pain Therapeutic Discovery will use the leveraged state funding to develop a sustaining, externally funded model to ensure continued success and progress.

(12) Benchmarks:

- 2024 Staff recruitment and facility implementation. Establish academic/industry advisory board.
- 2024 Identify pain targets and launch drug discovery efforts
- 2025 Additional staff recruitment and completion of state-of-art human tissue core
- 2025 Composition of matter intellectual property fillings. Establish TX-based private sector partners/create spinouts for development

738 The University of Texas at Dallas

(13) Performance Reviews:

The Center performance will be reviewed annually by relevant university leadership with input from the Center advisory board.

738 The University of Texas at Dallas

Crow Museum of Asian Art

(1) Year Non-Formula Support Item First Funded:	2024
Year Non-Formula Support Item Established:	2024
Original Appropriation:	\$0

(2) Mission:

The Crow Museum of Asian Art at The University of Texas at Dallas requests exceptional item funding for the development and launch of an arts-based University Student Docent Program initiative, based on the Crow Museum's permanent collection. In 2019, the Trammell and Margaret Crow family donated to the University the entire collection of the Trammell and Margaret Crow Museum of Asian Art. The Crow Museum's collection demonstrates the diversity of Asian art, with more than 1,000 works from Cambodia, China (including Tibet), India, Indonesia, Japan, Korea, Myanmar, Nepal, Pakistan, Thailand and Vietnam, spanning from the ancient to the contemporary, as well as a library of more than 12,000 books, catalogs and journals.

This funding will train UT Dallas students in art conservation, art collection, and art historical and artifact research to help foster an appreciation for this field and develop docents for the Crow Museum. These docents will also be valuable when the University opens in 2024 the new Edith and Peter O'Donnell Jr. Athenaeum, which will house not only a second Crow Museum but also serve as the initial building of a new arts district at UT Dallas.

(3) (a) Major Accomplishments to Date:

The Crow Museum of Asian Art has successfully led a comprehensive museum education program specifically designed for visitors of all ages. Applying the most relevant teaching and instructional practices to create dynamic, educational, and entertaining tours, the Crow has welcomed more than 1,000,000 visitors through group and private opportunities. Past docents underwent a rigorous months-long training program and educational class to learn about, research, and write about the Crow Museum's permanent collection with an academic and approachable mindset. The Museum worked with regional educators, professors, and teachers to design museum art historic curricula that educators could take back into their classrooms for deeper learning throughout the semester. Digital and online resources such as Crow 360 (a virtual AR tool) were created to further enhance the tour experience.

Building upon these past models of success and learning more updated best practices in the field of museum education will be among the highest of priorities for the Crow Museum staff in designing a Student Docent program worthy of The University of Texas at Dallas student population.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

738 The University of Texas at Dallas

State funding will ensure the Crow Museum will permit the hiring of full-time, qualified staff to design the Student Docent and art conservation study programs and create applicable training materials. With existing relationships and collaborations in place, state funding will catalyze the program and attract museum education leaders of the highest caliber from across the country. Student docents may be trained and ready to lead tours and special projects by Spring 2024, in time for the opening of the Athenaeum. Student docents would also serve as onsite survey takers for both the downtown Crow Museum location and campus Athenaeum visitors, capturing demographic information, interest, and contact information to better understand guests. Art and artifact conservation study and research would be integrated into training materials, further garnering the University's reputation as a university deeply invested in the arts.

Additional major accomplishments would include a researched and published handbook/student docent training manual and an aspirational goal to have every student on campus visit the Athenaeum at least once by summer 2025.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

None.

(5) Formula Funding:

None.

(6) Category:

Public Service

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Gift funds.

(9) Impact of Not Funding:

Without this grant, the Crow Museum will not launch this program.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuation:

Funding would be requested each biennium to sustain the program.

(11) Non-Formula Support Associated with Time Frame:

Funding would be requested each biennium to sustain the program.

(12) Benchmarks:

738 The University of Texas at Dallas

- 2024 – Identify and hire staff
- 2024 – Identify the number of hours student docent training will take
- 2024 – Identify and enroll interested students in the student docent program
- 2024 – Student docents trained in Crow permanent collection, museum education best practices, and public speaking/tour skills
- 2024 – Student docents have begun conducting tours without Crow staff
- 2024 – Student docents, with Crow staff, to have created and designed docent pamphlets, maps, and other takeaways for visitors
- 2024 - Students have access to the Athenaeum conservation lab
- 2024 – Student docents have begun conducting onsite visitor surveys
- 2025 – Continued and increased student docent participation
- 2025 – Increased number of student tour groups
- 2025 – Expanded variety of tours given
- 2025 – Student Docent program handbook published
- 2025 – Online/virtual student tours created by student docents
- 2025 – Multilingual tours given by student docents
- 2025 - Art and objects from around the world would be on loan for students to research and study in comprehensive manner

(13) Performance Reviews:

Executive leadership at the Crow Museum and at the University will annually review the success of the program.

738 The University of Texas at Dallas

Intensive Summer Academic Bridge Program

(1) Year Non-Formula Support Item First Funded:	2000
Year Non-Formula Support Item Established:	2000
Original Appropriation:	\$250,000

(2) Mission:

Increased state funding is requested for the Academic Bridge Program, which recruits students from urban school districts that do not send large proportions of their graduating seniors to selective universities. Typically, these students are members of the first generation in their families to attempt higher education who have the potential to succeed in a rigorous college environment if provided effective support. Many are from minority groups that are underrepresented in college. The Program has a decade-long record proving that it has the solution to this challenge. It commences with an intensive “speed-up” program offered on campus during the summer before the fall of the freshman year that features intensive study of math, science, writing, and time-management skills. This is followed with continued support by organized group study and peer tutorial sessions during the first two years of college.

Current nonformula support to this Program is \$1,326,830/biennium, and increased funds would be used to increase the amount of students accepted into the program, provide scholarships and hire more full-time tutors.

(3) (a) Major Accomplishments to Date:

The Academic Bridge Program has recorded extraordinary achievements in assisting promising students as they make the transition from inadequate K-12 educational preparations to successful study of rigorous college curricula. The Program is reviewed annually, primarily focused on freshman to sophomore retention rates and 6-year graduation rates. Ninety percent (90%) of freshmen return as sophomores, and the 6-year graduation rate is 61%. The 6-year graduation rate for Bridge students has increased by over one percentage point per year, from 55% in 2015 to 66% in 2021.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The Academic Bridge Program and its leadership will work to further improve retention and graduation rates of Bridge students. The Program is developing a national model for access and success of underrepresented groups. Increased funding would enable the program to increase to from 27 to 40 new students each year and allow for enhanced support in the form of tutors and scholarships.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

None.

(5) Formula Funding:

The students in the program generate the traditional formula funding for undergraduates.

(6) Category:

Public Service

738 The University of Texas at Dallas

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Local UT Dallas funds and some support from local philanthropy.

(9) Impact of Not Funding:

The Program would be reduced drastically and, barring massive philanthropic funding, might have to be discontinued.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Special item support will be needed on a continuing basis for the program to continue.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

The benchmarks of the program are the number of graduates annually.

(13) Performance Reviews:

The Program is reviewed annually, primarily focused on freshman to sophomore retention rates and 6-year graduation rates. The primary metrics for this program are a 90% freshman to sophomore retention rate and at least a 60% 6-year graduation rate.

738 The University of Texas at Dallas

Middle School Brain Years

(1) Year Non-Formula Support Item First Funded:	2010
Year Non-Formula Support Item Established:	2010
Original Appropriation:	\$6,000,000

(2) Mission:

The Middle School Brain Years (MSBY) initiative developed by the UT Dallas Center for BrainHealth advances the reasoning, problem solving, and innovation skills of young adolescents. During the middle school years (early adolescence), the brain undergoes an epoch in development that prepares the neural connections to develop higher-order executive function skills, such as analysis, problem solving, and innovation. This successful program has helped raise STAAR scores by 25% or more and improve academic performance in thousands of Texas students. Investing in student learning during the middle school years allows students to attain career, military, and college readiness, positively impacting the Texas economic forecast for years to come.

(3) (a) Major Accomplishments to Date:

Reaching more than 85,000 middle school students, the UT Dallas Center for BrainHealth has demonstrated that middle school children can develop higher-order thinking skills, and teachers can be trained to deliver a program that uses cognitive neuroscience to teach complex brain function. As documented in Gamino, et al., 2022. Higher-Order Executive Function in Middle School: Training Teachers to Enhance Cognition in Young Adolescents. *Frontiers in Psychology, Special Issue*, students demonstrate up to 50% improvement in STAAR scores across all tested content areas compared to peers and regardless of the teacher's content focus.

Improvements in students' mental health after receiving the MSBY program, have been documented in Gamino, et al., (submitted), *Alleviating Mental Distress in Adolescence: Can Higher Order Executive Function Training Play a Role*, demonstrating that the impact of teaching students cognitive skills far exceeds academic improvement for students from all socioeconomic levels, as they develop skills that will enhance their well-being for years to come.

Teachers and schools receive continuing support from the MSBY team, including classroom visits, leadership workshops, and professional development. Teachers new to the program receive an intensive 30-hour training program, while teachers with program experience attend an annual 1½ day review course to enhance their skills.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The Middle School Brain Years initiative has increased the number of students who benefit from the program each year. Following students in the years after their participation in the program will further elucidate this investment in Texas' future economic growth. Teacher retention has suffered due to pandemic related resignations/reassignments, etc., nevertheless, the program continues to find success with virtual options.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

Private funds and external research grants.

738 The University of Texas at Dallas

(5) Formula Funding:

This program generates no formula funding.

(6) Category:

Public Service

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

Private gift funds.

(9) Impact of Not Funding:

When students enter high school lacking higher-order thinking skills, their learning, grade-level promotion, and ability to graduate on time suffers enormously. Training students during the middle school years proactively helps prevent dropout while preparing students to be college, military, and career ready. Continuation of state funding will contribute to developing a workforce for Texas that is innovative, productive, and less dependent on the government to meet basic needs. Without funding, this successful and essential program would be greatly scaled back or eliminated entirely.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuation:

Funding is needed on a permanent basis if the program is to be continued.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

The program benchmarks are the numbers of students being provided the training, as well as the number of teachers retained and recruited each year. Teachers find their teaching style changes with their involvement in the program as they become more confident in providing opportunities for students to think at a deeper level.

(13) Performance Reviews:

MSBY staff continue to collect internal and external data to demonstrate the efficacy of the program in various schools/geographic areas/urban and rural public schools. Specific reviews include:

1. Collection of teacher-reported assessments of effectiveness of training protocol;
2. Periodic observations to ensure teachers maintain the fidelity of the program to maintain and improve student learning performance in the classroom;
3. Review of student STAAR test performance data to evaluate student ability to apply learning strategies across content areas – science, math, history and reading.
4. Evaluation of cost per student to deliver quality programming while keeping costs low.

738 The University of Texas at Dallas

Nanotechnology

(1) Year Non-Formula Support Item First Funded:	2002
Year Non-Formula Support Item Established:	2000
Original Appropriation:	\$250,000

(2) Mission:

The mission of the UT Dallas NanoTech Institute is to conduct research and develop innovations in nanotechnology, an area that enables the fabrication of materials and devices having entirely new physical or chemical properties as a result of engineering structures smaller than the wavelength of light. Nanoscience is revolutionizing such disparate fields as electronics, medicine, communications, energy, and manufacturing. The Institute's industrial affiliates program enables participating companies to gain early access to breakthroughs and helps the Institute focus research so that it addresses the most important needs of industry.

The Institute founded and sponsors the George A. Jeffrey NanoExplorers Program, which promotes nanotechnology-based education for high school students entering the 10th-12th grades. This program inspires high school students to become productive scientists and engineers by enabling them to do original research work, which can result in their co-authorship of publications and patents. Many UT Dallas undergraduates receive their initial training on how to do original research in the NanoTech Institute, with research costs paid for by the Institute.

The Institute also sponsors the NanoInventors program, which enables retirees and individuals in job transitions to conduct their own research.

(3) (a) Major Accomplishments to Date:

The NanoTech Institute continues to generate internationally recognized technological breakthroughs, which are published in the highest impact journals and provide the basis for the 36 issued U.S. patents and many more issued foreign patents. Over 30 researchers work in the Institute each year. Since 2017, the Institute has published over 73 refereed journal articles including four papers in Science, and filed corresponding patents for the most powerful harvester of waste mechanical energy as electrical energy (for frequencies above a few cycles per second), the most powerful artificial muscles, and a previously unknown method for high efficiency refrigeration. Such discoveries continue to stimulate development of commercial products and new enterprises. A licensee of our polymer artificial muscles patents has used these muscles to make comfort adjusting jackets that automatically become more insulating as it becomes colder, which are produced by Ralph Lauren and sold by Macy's and other companies. The Institute generates significant external research funding from federal agencies as well as from other federal and private organizations.

Over 400 high school students have participated in the NanoExplorers program. Some become UT Dallas students, and others go on to places like Harvard, Stanford, and MIT. Many come back to study at the Institute each summer. The Institute also provides lectures and demonstrations that help inspire minds from kindergarten to retirement.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

738 The University of Texas at Dallas

(1) The Institute plans to transition its patented twistron technology for harvesting mechanical energy as electricity from carbon nanotube yarns to much cheaper electrospinning-derived nanofiber yarns without sacrificing the up to 12-fold advantage realized in gravimetric electrical power output compared to any prior-art material-based harvester. This will ensure that twistrons can be used in the future for such large-scale applications as harvesting ocean wave energy to power cities. (2) Without sacrificing its up to 100-fold realized advantage in gravimetric mechanical energy output per muscle weight compared to natural muscles, the Institute will convert its battery-powered, giant-stroke coiled yarn muscles to those that are directly fuel powered by high-energy-density fuels, thereby enabling much longer term operation of autonomous robots. (3) The Institute will increase the performance of its twist fridges, which operate by using the twistocaloric entropy changes during stretch cycles or twist cycles of twisted polymer or shape memory fibers, so that the refrigeration efficiency more greatly exceeds that of conventional refrigerators. While initial advances in these areas were published in Science and protected by issued US patents, these further anticipated advances will further increase the value of these technologies for humanity.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

None.

(5) Formula Funding:

None.

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

The NanoTech Institute generates approximately \$700,000 per year of funding from external grants and contracts.

(9) Impact of Not Funding:

Without the requested funding, the Institute's capacity to compete successfully for large major-project grants and contracts will be reduced. Additionally, the NanoExplorers program will be impacted.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

The NanoTech Institute will never generate significant formula funding, so there will always be the need for the special item support.

(11) Non-Formula Support Associated with Time Frame:

N/A

738 The University of Texas at Dallas

(12) Benchmarks:

Benchmarks for this program are simple, clear, and objective - namely generation of external funding, publications in prestigious peer-reviewed journals, patents, spin-off private companies, and especially enhanced education for students of all ages.

(13) Performance Reviews:

Performance reviews are regularly carried out by monitoring the benchmarks noted above. Specifically, financial performance is reviewed in that funding from grants and contracts to the Institute will amount to at least three times the annual special item funding.

738 The University of Texas at Dallas

North Texas Semiconductor Research and Development Hub

(1) Year Non-Formula Support Item First Funded:	2024
Year Non-Formula Support Item Established:	2024
Original Appropriation:	\$0

(2) Mission:

North Texas is home to a significant industry presence for semiconductor-related technologies. However nationwide, the semiconductor industry has a severe labor shortage, particularly among technicians. A key reason for the labor shortage for these high-paying jobs is the absence of training facilities due to the expensive nature of the equipment and lack of programs poised to meet the pipeline needs.

The North Texas Semiconductor Research and Development Hub will address the pressing workforce need in this industry and foster innovative start-up companies in the semiconductor technology area. Working in partnership with community colleges, the Hub will provide hands-on experiences to broaden access to semiconductor industry education and training to ensure Texas continues to have a steady workforce pipeline for area companies. The Hub will also provide shared, yet secure, access to critical equipment for fledgling small businesses to enable entrepreneurs to build prototypes and launch small-scale production. The Hub will serve as an incubator program for semiconductor entrepreneurs, particularly those who are focusing on national security/infrastructure needs, to grow their businesses and produce prototype devices in a completely secure facility. The Hub will also serve as a secure focal point for UT Dallas researchers to engage with the Department of Defense and homeland defense partners to address semiconductor research problems of national security and significance.

(3) (a) Major Accomplishments to Date:

UT Dallas is uniquely positioned to deliver this capability due to its well-established expertise in semiconductor research, strategic location, entrepreneurship programs, partnerships with community colleges, and connections with semiconductor industry partners which include Texas Instruments, Qorvo, and IntelliEPI. The University conducts federally and industry sponsored research in the areas of electronic materials, polymers, biomaterials, materials for energy and metals and their composites drawing upon fields of chemistry, physics, and engineering. Research involves processing and synthesis, characterization and testing, device design and fabrication of materials, and their uses in various applications. Because the University's materials science research is heavily focused on applications, virtually all students who enroll in the program will be involved in research and development work funded by industry or the government, making them attractive to potential employers upon graduation. The University has a world-class research facilities and infrastructure, including a state-of-the art clean room located in the Natural Science and Engineering Research Laboratory.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The Hub will complement resources and capabilities available in the UT Dallas cleanroom facility, which makes its resources available to both the UT Dallas research community and external entities. Specifically, the Hub will primarily support prototyping of materials, devices and systems that may be developed, at least in part, using resources in the cleanroom facility. The Hub will be implemented in two phases over the first biennium. In year 1, the emphasis will be to establish processing equipment whereas in year 2, the focus will be on establishing packaging and testing equipment.

For improved impact and accessibility, the Hub will have dedicated and separate space for workforce development using virtual reality tools that the team will develop in close collaboration with partner companies and other stakeholders. The facility will be available for hands-on training with real equipment on site.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

UT Dallas has earned significant federal support from federal agencies and private industry that demonstrates expertise in the fundamental research that underlies this endeavor.

(5) Formula Funding:

None.

(6) Category:

Research Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

None.

(9) Impact of Not Funding:

Sustained leadership in advanced manufacturing, particularly semiconductors, requires a well-trained workforce and continuous innovation. The impact of not funding this exceptional item is that these significant problems remains unaddressed leading to inability of core Texas semiconductor industries unable to fulfill work force needs. Moreover, the opportunity for maintaining global leadership in semiconductor technology and national security is threatened.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

Exceptional item funding is requested for three biennia with expiration at the end of FY2029. During that six-year time frame, the North Texas Semiconductor Research and Development Hub will use the leveraged state funding to develop a sustaining, externally funded model to ensure continued success and progress.

(11) Non-Formula Support Associated with Time Frame:

Exceptional item funding is requested for three biennia with expiration at the end of FY2029. During that six-year time frame, the North Texas Semiconductor Research and Development Hub will use the leveraged state funding to develop a sustaining, externally funded model to ensure continued success and progress.

(12) Benchmarks:

2024 Staff recruitment and establish academic/industry advisory board.
2024 Acquisition and implementation of semiconductor processing equipment for prototyping
2025 Acquisition and implementation of semiconductor packaging and testing equipment
2025 Implementation of baseline processes and workforce development programs

738 The University of Texas at Dallas

(13) Performance Reviews:

The Hub performance will be reviewed annually by relevant university leadership with input from the Hub advisory board.
